## DETAILED ACTION

### *Drawings*

The replacement sheet 2 of drawings was received on 07 October 2003. These drawings are approved.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 5-8 and 10-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There does not appear to be support for the structural combination as is set forth in claim 1. The claim sets forth in line 10 that the water conduit (20) is closed on its free end while lines 16-17 set forth that a connection piece to an onward-leading water line adjoins the water conduit (20) on its free end. There is no embodiment set forth in the disclosure that includes both a closed free end and onward-leading water line. Further, no embodiment is set forth that has both a stub on the

Art Unit: 1744

nozzle body that engages an opening in the housing and has an onward-leading water line.

Clarification is requested.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 5-8 and 10-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 3 and 12 both refer to reference numeral "14", however, they use different terminology. In lines 10 and 16-17, defining the water conduit as being closed on its free end and having an onward-leading water line appears inconsistent. Clarification is requested. In line 14, there is no antecedent basis for "the outer part".

In claim 5, line 1, use of "claim 4 1" appears confusing. It is not clear what claim applicant desires for claim 5 to depend from.

In claim 6, line 2, there is no antecedent basis for "the orifice".

In claim 7, line 2, it appears "openings" should be ---opening--- since only one opening has been previously set forth.

*Response to Arguments*

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection. As set forth above, there does not appear to be support for a wiper arm with nozzle as is claimed in claim 1. In particular, one with a nozzle having an onward leading water line, closed free end and a stub surrounding the connecting conduit which engages the inside of an opening of the housing.

*Conclusion*

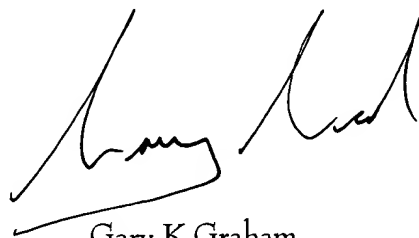

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
